aasthaketanp@gmail.com | 904-547-9638 | Indianapolis, IN | [Portfolio](#)

CORE SKILLS

Platforms & Languages: SQL, Python, Microsoft Fabric, Azure, Databricks

Data Engineering: Pipeline orchestration, metadata-driven ingestion, relational data modeling (star schema), incremental data processing

BI & Analytics: Power BI, Tableau, KPI & metric design, self-service dashboard

Data Quality & Governance: Data accuracy & integrity, compliance-driven analytics

PROFESSIONAL EXPERIENCE

RISE INDY | Data Manager

Indianapolis, IN | March 2024 – Present

- Migrated data from multiple sources (CRM systems, and external data) into **Microsoft Fabric**, creating a centralized data platform and improving data accessibility by **30%**.
- Designed and implemented a **Lakehouse architecture** (Bronze, Silver, Gold layers), reducing processing time by 25% and improve scalability of analytics workflows.
- Built and optimized **ETL/ELT pipelines using PySpark and SQL**, automating data transformations and reducing manual data preparation efforts by **40%**.
- Developed **data transformation logic in PySpark**, including schema validation, data profiling, and handling missing or inconsistent data.
- Improved data quality by implementing **deduplication and validation checks**, reducing duplicate records and increasing trust in reporting.
- Modeled and maintained **data schemas and curated tables**, improving query performance and reducing dashboard load times by **20%**.
- Created **Power BI dashboards and semantic models** on top of Fabric, enabling stakeholders to track KPIs and support faster, data-driven decision making.

Indiana Department of Revenue | Data Analyst

Indianapolis, IN | Jan 2024 – March 2024

- Led tax data analysis and statutory interpretation to support compliance initiatives, increasing detection of fraudulent tax returns by **40%**.
- Applied statistical analysis to tax production data to identify operational inefficiencies and improvement opportunities.
- Developed and optimized **SQL** queries to extract, transform, and analyze data from the ITS system, enabling accurate compliance reporting and discrepancy detection.
- Collaborated cross-functionally to optimize workload planning and prioritization, improving operational efficiency and team productivity.

EDUCATION

Master of Science in Data Science – Indiana University Bloomington, IN

Bachelor of Engineering in Information Technology – Gujarat Technological University
